What if you can’t get out?

• Use your cell phone and call for help.
• Try to get someone’s attention.
• Close and seal your door to keep smoke out.
• Hang or wave something from the window to get attention.
• Yell out the window.

Crawl low to the floor

• Thick smoke can make it impossible to see. Toxic chemicals in the smoke can become deadly in seconds.

• Heat and smoke rise—the freshest, safest air is close to the floor. Even fire fighters crawl low.
