What if you can’t get out?

• Use your cell phone and call for help.
• Try to get someone’s attention.
• Close and seal your door to keep smoke out.
• Hang or wave something from the window to get attention.
• Yell out the window.

Get Out Alive

If you get caught in a fire situation, survival is your first priority.

• Know two ways out.
• Feel the door.

1) If it’s hot - don’t open it.
   Instead, use your second way out, or go to a window and call for help.

2) If it’s cool - stay low and open it slowly.
   Check for smoke and fire before going out.

• Get out before calling 911.
• If a fire alarm is available, pull it on the way out.
• Keep the fire from spreading by closing the door behind you.
• Knock on doors and yell “FIRE” as you leave.

Crawl low to the floor

• Thick smoke can make it impossible to see.
  Toxic chemicals in the smoke can become deadly in seconds.

• Heat and smoke rise—the freshest, safest air is close to the floor. Even fire fighters crawl low.

DO NOT ...

• Do NOT search for others
• Do NOT try to gather your things
You do NOT have time to do anything but escape.

Friends keep friends safe from fire-related hazards.
