

LINKING EXPERIENCE, TECHNOLOGY, AND SCIENCE

The logo consists of three interlocking rings. The left and right rings are red, and the middle ring is blue. They are arranged in a horizontal row, overlapping each other.

ENGINEERS | CONSULTANTS | FIRE EXPERTS

WHO WE ARE

Organized in 1970, *FIREPRO* is a fire engineering firm dedicated to applying advanced technology to today's complex fire problems.

Serving as a technical resource to a broad range of clients, we specialize in reducing fire issues to understandable forms and helping to select logical, cost-effective solutions. We routinely design fire alarm, sprinkler and special hazard fire protection systems. We are experienced in analyzing fire incidents by fitting the puzzle pieces together to determine a fire's origin, cause, and relevant factors. These findings are supported by the application of fire science and proven, reliable methodology.

Our professional staff members hold degrees in engineering, management, and related studies. Most hold advanced degrees, professional certification, or are registered professional engineers who have fire service or fire protection industry experience. Our staff stays abreast of developments in fire safety and forensics. Many are NFPA technical committee members or hold leadership positions in professional organizations. Interdisciplinary project teams, with broad experience, support our clients with practical solutions to the problem at hand.

We welcome the opportunity to assist you with our fire engineering, research, or fire and explosion incident analysis services.

FIRE PROTECTION ENGINEERING AND DESIGN

FIREPRO's professional engineers provide complete fire protection engineering services from conceptual engineering, to detailed drawings and construction documents, to construction observation and final acceptance test monitoring.

Services Include:

- Fire Alarm System Design
- Sprinkler System Design
- Fire Alarm and Sprinkler System Performance Analysis
- Egress System Design and Analysis
- Smoke Control Systems

CONSULTING

FIRE SAFETY

The objective of *FIREPRO's* consulting services is to sufficiently educate clients in scientific and technical principles and codes and standard requirements that relate to specific concerns. We specialize in reducing complex fire issues to an understandable and instinctive form, allowing clients to take a logical approach to improving fire safety.

Services Include:

- Building and Fire Code Review
- Existing Building Compliance Surveys
- Fire Evacuation Planning
- Hazard Analysis
- Fire Modeling
- Alternative Approaches

MARKETING SUPPORT

FIREPRO offers professional consulting, management and marketing support services to the fire industry. From comprehensive market research and analysis, to high level marketing communication services and support materials, we are experienced in the fire protection industry and work closely with our clients to achieve their goals.

Services Include:

- Research Studies
- Product Research & Development
- Fire Industry Market Research Reports
- Marketing Communication Services
- Technical Writing
- Web Design and Development
- Graphic Design and Production
- Tactical Marketing Services

FIRE INVESTIGATION AND LITIGATION SUPPORT

FIREPRO's fire experts can provide a range of services from fire scene investigations to litigation support. We assist clients through the application of technology and proven, reliable fire reconstruction methods, which support the analyses of fire losses and expert testimony.

Services Include:

- Fire and Explosion Investigation
- Reconstruction of Fire and Explosion Incidents
- Equipment Examinations
- Fire Alarm and Suppression System Failure Analysis
- Forensic Laboratory Coordination
- Expert Testimony
- Trial Exhibits: Models, Time Lines, and Graphics
